

Individual film solutions for furniture

Innovative and efficient protection –
As much protection as possible, as little adhesion
as necessary – Bischof+Klein perfectly meets
these standard requirements concerning protective
films for diverse surfaces.

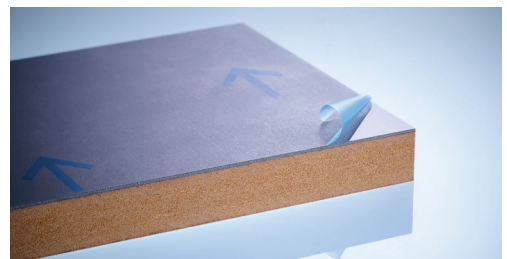

High gloss 2D/3D Application

- Transparent or translucent blue protective films with low gel level
- Ideal solution for PET, PVC, ABS/PMMA surface with highest quality

High gloss flat lamination

- Transparent or protective films of various colours with low gel level on request
- Co-ordination with different surfaces: through in-house film extrusion, special adhesives (both rubber and acrylates) as well as an individually adjustable application quantity and adhesion

Matt/structured surfaces flat lamination

- Optimal solution specifically for highly structured surfaces
- Co-ordination with different surfaces: through in-house film extrusion, special adhesives (both rubber and acrylates) as well as an individually adjustable application quantity and adhesion

Individual solutions for special requirements

For us, individual protection for your surfaces means producing individual products. Our self-adhesive and self-adhering films leave no desire unfulfilled in terms of protection characteristics, adhesion levels, thermal forming capability, film thickness or release behaviour. This is why we regularly manufacture over 1,000 articles for the market; these can be individually selected from our portfolio and adapted.

SK 5010AD32S1Q1	High gloss PET, PVC, ABS/ PMMA 2D/3D application
SK 5035AD32S1Q1	High gloss/ matt PET, PVC, ABS/ PMMA 2D/ 3D application
SK PP 4015 AD68 S1	High gloss furniture/ HPL
SK PP 4070 AD80 W15	Matt/ structured furniture/ HPL
SK 5090 AD80 W15	Structured furniture/ HPL

Material properties with film know-how from Bischof+Klein

- ✓ Depending on the application, films with low gel level
- ✓ Can be printed with up to 3 colours
- ✓ Various adhesive systems (acrylate LH, LF, rubber), in-house acrylate production
- ✓ Protective films are always abrasion-resistant and can be removed without residues

Thanks to our special know-how, we know which film variant is suitable. We always keep an eye on the aspects of sustainability and sparing use of resources.
